## Charges

I have made  
I chose my favorite design from my design sheets and changed its appearance by removing the bar and placing the cat in grass I feel that it enhances the design  
drops straight into the cat.

## Difficult parts

I think that on the real product the points which will be difficult and perhaps not look so good as I have finished on the ears. I am not quite sure how they will turn out like on the finished product I may find that I will need to change the construction of the ears as I go along. The other part which I am concerned as to how well it will fit the head of the cat. I am not sure how well it is going to fit onto the body, hopefully it will be successful if I do all of my measurements correctly.

## Eye-catching

The things which catch my eye as being good points about my design are that the grass I think will be eye catching surrounding the cat as it will be bright and clean. Another good point I feel is that on the front of the cat it shows what your money is going to, which charity it goes around 'The Cat's Protection'. The eyes of the cat will be constructed by building up layers to create the right shape and colored eye. They will be made out of brightly coloured acrylic which works really well against the wood to create the stripes of the cat, these I feel will be eye-catching.

Eye-catching

(Solid yellow color acrylic piece)  
 and bulb which will then have a bulb through the hole to give off light  
 on a stand and then the wires will be tucked away in the triangle space out of  
 inside of the triangle wires will be out of  
 all 3 pieces will be glued together  
 little dross to small circles as it will be easier to manufacture and still look  
 The curtain pole will be attached like this:  
 Straight because I have found if I do it round on the corners the curtains won't go all the way  
 I am going to use metal for the base draw because I think it will be easier or safer to use (metal number 1)
